

## ARE YOU READY FOR A DENTAL EMERGENCY?

Do you ever wonder what you should do if you have an emergency and cannot get to the dentist right away? There are some great products that you can pick up in a store or order ahead of time just in case. Below, I've described some of these items.

### [www.DentistOnCall.com](http://www.DentistOnCall.com)

This is a website that sells these (and other) products, directly to the consumer. They also have a link so that you can find a local retailer. You can also compare many of their products, so you can see which ones might be appropriate for your situation.

#### Lost crown / cap - Dentemp

This product is intended to hold a loose crown / cap. It also helps to provide pain relief. Note it is not indicated to use where there is swelling or throbbing pain. Be sure to read the FAQ section for many more details!

#### Lost filling - Refilit

This product is intended to temporize a tooth with a lost filling. It has a nice cherry flavor, too! The instructions are simple: form the material into a ball, push it into the tooth, bite down a number of times to shape it, and you're done! Let it set for one hour before eating on it.

#### Broken denture - Repair-It

This product is to fix fractures in your denture. Many patients are satisfied with the repairs they do on their own, but please remember to have a dentist evaluate your repair to make sure its not causing harm to your mouth! Again, be sure to read the FAQs.
